Claims 7-12, 15 and 30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the response filed March 2, 2004. Claims 7 and 8 do not read on the elected species because Z in formula 10 of claim 13 is equivalent to X² in formula 2 of claims 1 and 2 and claim 7 requires that X² be a diol while claim 13 requires that Z be a tri-, tetra-, penta- or hexa-hydric alcohol. Claim 9 does not read on the elected species because formula 10 in claim 13 does not have at least one terminal acid group as required in claim 9.

Claims 16-25 and 27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the response filed March 2, 2004.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 26, 28 and 29 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Friedlander (5,536,760). The reference teaches unsaturated polyesters containing structurally incorporated vinyl ether. Fumaric acid is a preferred acid for use in preparing the polyester because it polymerizes more readily with vinyl ether. Compositions containing the vinyl ether modified unsaturated polyesters can be cured using radical polymerization initiators. See col. 2, lines 20-35, col. 4, lines 1-40 and col. 5, line

50 through col. 6, line 10. As a choice of unsaturated acid is required, this rejection is made under 35 USC 102 and 103.

Claims 2, 4-6, 26, 28 and 29 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EP 0957079. The reference teaches propenyl and allyl ether esters of unsaturated dicarboxylic acids that include fumaric acid. The ether esters can have two or more groups represented by formula 5 recited in claim 2 and can be cured using radical polymerization initiators. See formulae 1, 2, 4-a, 4-b and 5, paragraphs 0038, 0041 and 0054, and page 11, paragraphs 0087-0092. As a choice of components is required, this rejection is made under 35 USC 102 and 103.
